

Jig-Saw Heart

Jig-saw pieces
Paint
Scissors

Paintbrush
PVA glue
Sequins (optional)

Ribbon
Fishing line/Invisible thread

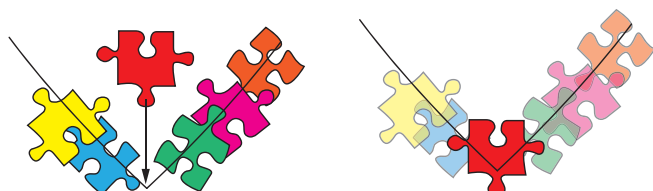

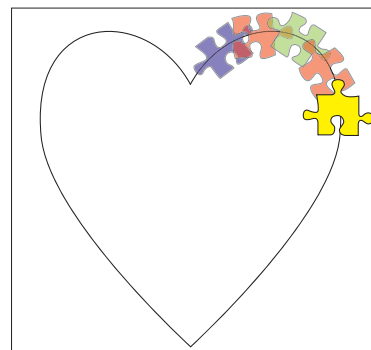

Paint the jigsaw puzzle pieces red and let them dry.

Painting both sides is optional.

(If you want to hang the heart in a window, it would be best to paint both sides.)

Draw a heart shape onto a piece of paper as a guide.

Glue the pieces to one another by placing one piece under the next overlapping the top piece each time.

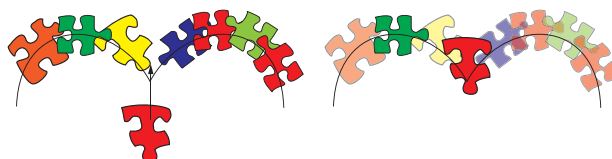

When the bottom of the heart has been reached start placing and gluing the pieces up the other side.

Place the piece that is going at the point on top of the two pieces on either side.

Do the same with the pieces at the top of the heart.

Place the piece that is going at the point on top of the two pieces on either side.

After the heart has been completed and has thoroughly dried paint a coat of PVA glue all over it and let dry.

This will varnish the heart and make it very shiny.

Glue sequins and pearls all around to decorate as required.

Tie on a bow with ribbon as shown in the sample.

Fishing line is tied on in order to hang the heart.
