

Sail Cars

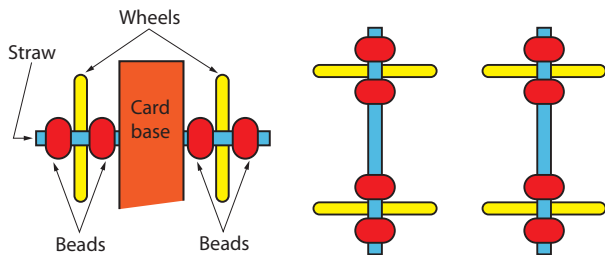

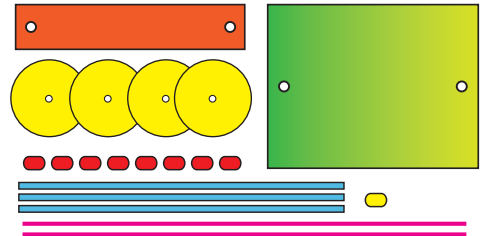

Colour card
9 pony beads
2 pipe cleaners

Pencil
Scissors
3 straws

Glue
2 pipe cleaners

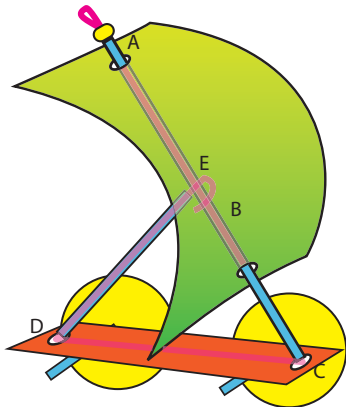

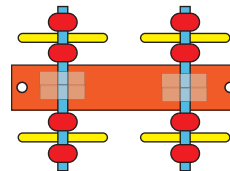

Cut out and gather together all the pieces you will need to make the sail car:

- 1 Card base (1 hole punched either end)
- 1 sail (1 hole punched either end)
- 4 wheels (1 hole punched in the middle)
- 3 straws
- 9 beads
- 2 long pipe cleaners

To assemble the wheels:
Cut a length of straw and glue one bead at one end. Add 1 wheel followed by 1 more bead. Leave enough space for the card base. Add 1 bead then 1 wheel. Add the last bead and glue this in place. Make another set of wheels.

Take the two sets of wheels and tape the card base to the straws

To assemble the sail:

Thread the pipe cleaner through the bead and then the straw, bend the end of the pipe cleaner over at the bead and glue in place. Thread this through the hole at the top of the sail (A).

Bring the straw out through the bottom hole of the sail (B).

Finish the straw at hole on the card base (C) and bend the pipe cleaner underneath the card to the hole at the other end (D), bring the pipe cleaner up through the hole.

Thread the other straw onto the pipe cleaner and bring up to half way along the straw which is behind the sail, bend the pipe cleaner around the straw to secure (E).

Now have a go at racing your sail cars along a flat surface.
