

Sundial

Materials

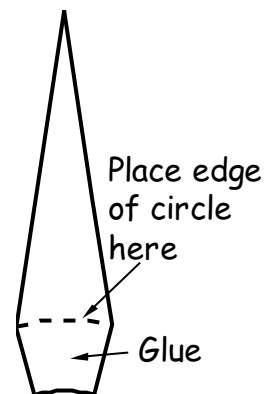

A4 card
Scissors
Pencils

Double sided tape/Pritt Stick
Sticks (2)
Straw

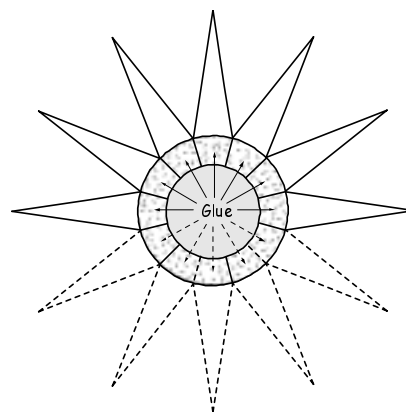

- 1 Draw around the circle and carefully cut out.
Find the center of the circle and punch a hole.

- 2 Draw around and carefully cut out 12 pointers.
Put the glue on the square end of one of the pointers and place it onto the circle at 12 o'clock.

- 3 Continue with each of the other pointers placing them at the clock positions on the circle.
Number each of the pointers like a clock.

- 4 Place a straw or stick in the center of the sundial and stand up carefully.

To position the sundial correctly, use the sun and your watch and at 12 noon place the pointers so that the shadow of the straw is pointing to 12.
