

Beaver Mask

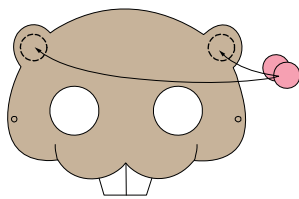

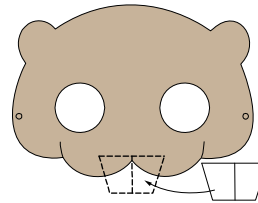

Template Brown Card Scraps of colour card	Elastic or chord Pencil Sellotape	Hole punch Scissors
---	---	------------------------

Place the mask template on to card and trace around the outside with the pencil.
Remove the template and leave on one side.
Cut out around the outside of the mask.

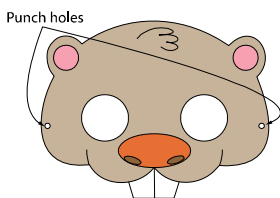

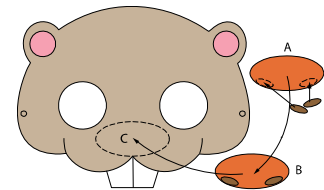

Carefully cut out the two eyeholes.

Cut out the Beavers front teeth.
Turn the mask over to the back side and glue the teeth in place.

Cut out two circles of pink card and glue in place at the ears.

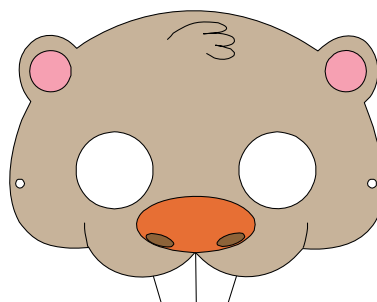

Cut out a nose and two nostrils. (You could colour in the nostrils to save cutting out very small pieces of card).
Glue the nose in place.

Mark the appropriate spot on each side of the mask to punch holes.

After you punch the holes, reinforce them with tape so that the mask doesn't rip while being worn.

Thread a length of elastic or chord through each hole and tie a knot to secure it.
Make sure the mask fits snugly but not too tightly around the head.
