

Friendship Sticks

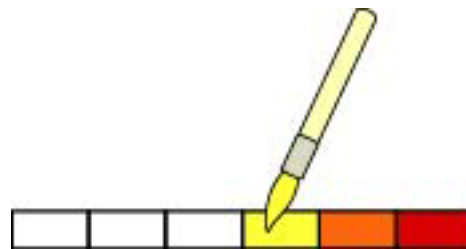

Flat Wooden sticks
Scissors
Cord or string

Paints -6 colours, or
Wool - 6 colours

PVA glue
Paintbrush

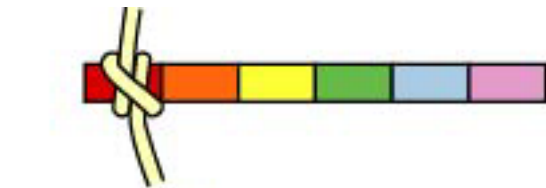

These vibrant sticks are banded with six colours, one for each letter in the word friend.

To make one, use a paint brush to paint 6 different-colour stripes around the stick.

Let the paint dry, then write a message on the stick with the marker.

Or, wind 6 different colour wools around the sticks using glue to secure each colour as you go along.

Tie a length of cord tightly around the top of the stick. Use a drop of glue to keep knot in place.

Give the friendship stick to a friend.

This little stick means friendship of a very special kind.
A friend is great, you know, and very nice to find.

It is made by the giver from a stick off the ground,
Just as friendship, in unexpected places, can be found.

It is bent to fit the curve of the earth,
It can also be a smile full of mirth.

Share your stick with a new found friend,
You might find the sharing will never end.
