

Leather Stamping

Leather
Stamping board
Non-slip mats

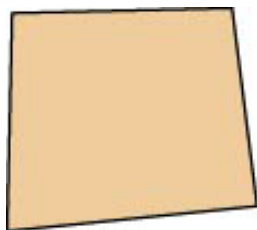

Mats
Mallet

Spray
Stamps

Prepare the work surface:

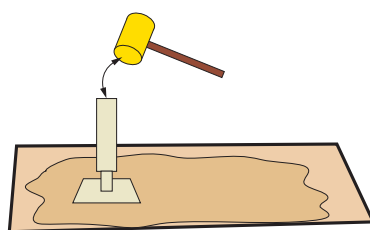

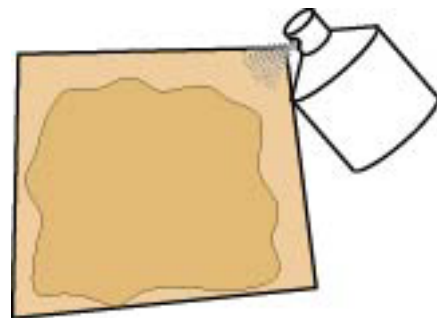

- Mat
- Non-slip mat
- Stamping board

These surfaces take the shock out of the stamping and protect the work surfaces.

Place the leather on the boards ready for stamping.

Spray the leather with water, just enough to dampen it.
Spray it all over or when the water dries it may leave water stains.

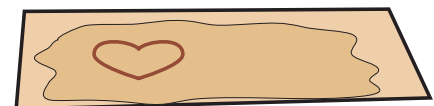

Place the required stamp onto the leather.

Hold it still with one hand.

With the other hand and using the mallet hit the stamp with force.

Remove the stamp carefully and an imprint in the leather will be left.

Warning

Please be careful when using the mallet

Hit the stamp — not your hand
