

# Lolly Stick Fish

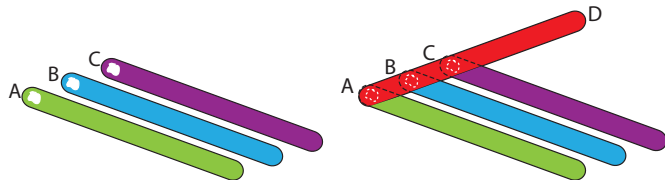

7 wood lolly sticks (plain or coloured)

1 Goggle eye  
Glue

Paintbrush (if required)  
Paint (if required)

Take the 7 wooden lolly sticks and paint them the colours you want your fish to be.

(You could buy the pre-coloured lolly sticks to cut out the painting step)

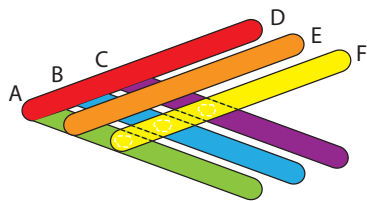

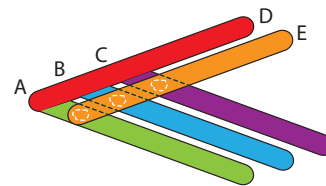

Take 3 of the lolly sticks (A, B and C) for the bottom half of the fish and lay out diagonally as shown.

Put some glue on the tips of the sticks.

Take the lolly stick D and lay over the 3 sticks, press down and leave to dry.

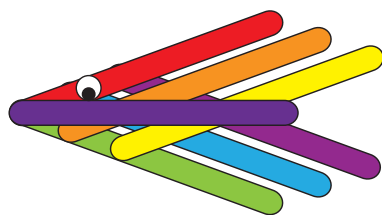

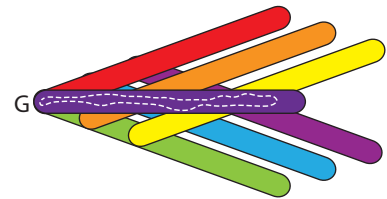

Put some more glue on A, B and C lolly sticks a bit further down.  
Place the next lolly stick, E, across the glue and press down firmly.

Put some more glue on the A, B and C lolly sticks a bit lower.

Place the third lolly stick, F, across the glue and press down firmly.

Take the last lolly stick, G, and put the glue along the length of one side.  
Turn it over and press this onto the fish shape at a right angle and press down.  
Leave the fish to dry.

Lastly place some glue on the goggle eye and stick onto lolly stick D.

The fish is now ready to hang up.
