

Mini Dream Catcher

Embroidery Threads
(or wool/string)

Scissors
Masking tape

Make the circle to the size required.

It is best to wind the wire around something that is the right size to give a perfect circle.

Join the ends of the wire.

Wind the thread around the circle with half hitches.

Take another piece of thread and wind that around the inside of the circle, each time you go round use the inner loops, keep going until the inside of the loop is full.

Use a half hitch for the dangling decorations.

Put a bead on the end of the hangers and secure in place with a knot.
