

Paper Plate Holder

2 paper plates
Wool

Glue
Hole punch

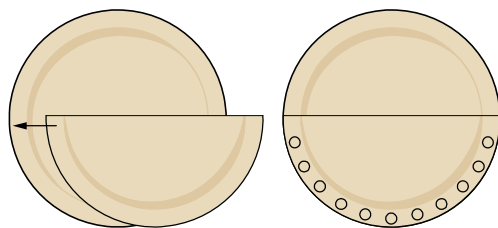

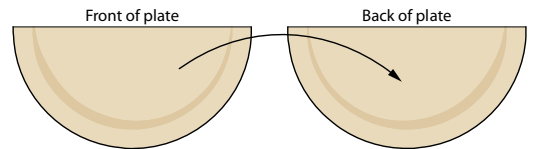

Scissors
Colouring pencils, crayons, felt tips

Start with two paper plates the same size.

Fold one of the paper plates in half and then cut along the fold.
Take one half of the cut paper plate and discard the other half.

Turn over the plate so that the eating side is downwards on the working surface.

Place the half plate on top of the whole plate with the eating sides facing.
Glue around the edge of the half plate, press together and leave to dry.
Punch holes around the plate through both thicknesses.

Cut a length of wool and thread the end through the holes from one side to the other.

Punch two holes at the top of the plate and put some wool through these holes for the hanger.
