

Pyrography

Wood shape
Pyrography tool

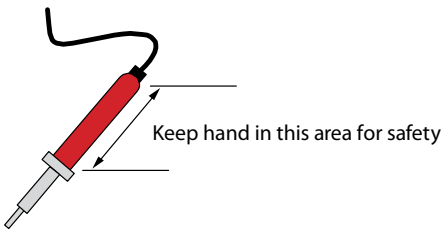

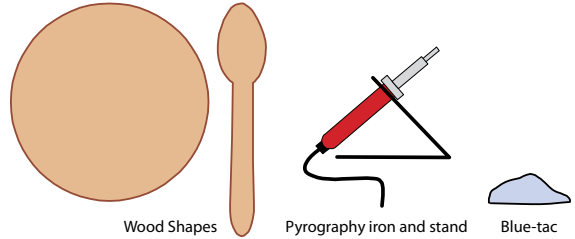

Stand
Pencil

Rubber
Blue tac

Get all your tools ready.

Put the pyrography iron onto the stand and plug into the power to get hot.

Make sure that you are working near to cold water in case of Emergencies.

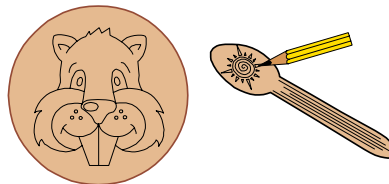

Remember when using the tool to keep your hand on the plastic panel.

BE CAREFUL — do not touch any of the metal parts.

If you get burnt by the iron, put your hand into cold water immediately then follow the First Aid instructions for burns.

Draw your design onto the wood with a pencil.

Place some blue-tac onto the table top.

Wedge the wood shape you will be using into the blue tac, so that it does not move and will make burning your design into the wood easier and will also save burns to the skin.

CAUTION — HOT TOOL

Please keep your hand on the plastic handle of the tool

Do not touch any of the metal parts

If you get a burn – Immerse your hand in cold water and seek assistance.
