

# Wind Chimes

Plastic bottle  
Bells  
Hole Punch

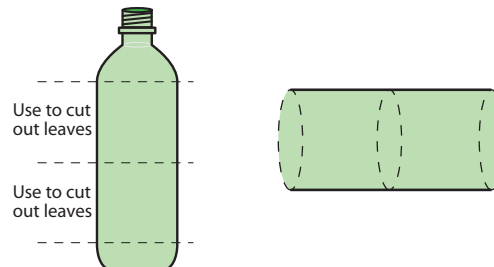

Beads  
Scissors

Straw/stick/bottle top  
Fishing line/string

Use a 500 ml size plastic drinks bottle.

Remove the label.

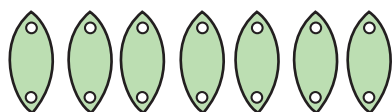

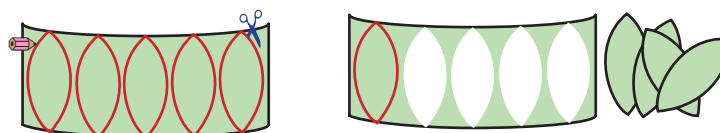

Cut out the flat section of the bottle.

Make sure that you have all the components ready for putting together.

Using the flat section of bottle draw on the leaves and then cut them out.

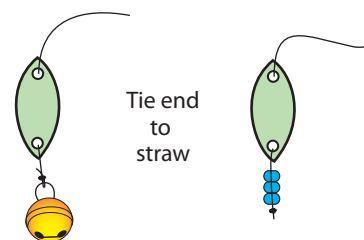

Get as many leaves as you need from the bottle.

Punch a single hole at the top and the bottom of each leaf with a single hole punch.

Tie a length of the fishing line or string to the top hole of each leaf using a secure knot.

Then tie the bells and/or beads to the bottom hole of each leaf with a secure knot.

Lastly tie each of your chimes securely to the straw.

To add a hanger, tie another piece of fishing line to either end of the straw, leaving enough slack to hang up the chimes.

You could also use a twig, or the top of the bottle as the hanger.
