

Wind Spinner

20 Beads (Hama beads are ideal)
Construction stick (or thin straw)

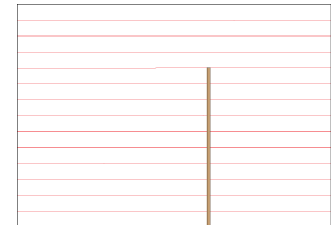

Colour card A4
Scissors

Glue

Cut out six strips of card (or whatever material you will be using).

If you use a stick that is just less than the width of A4 paper, then cut your card strips from the longer side of an A4 piece of card so that the card has a bend when you construct the spinner.

Punch a hole at both ends of each strip of card.

Take the construction stick, put some glue on one end only and slip the stopper bead onto the glue.

Place card 1 onto the stick;
Place bead A1 onto the stick.

continue with:

card 2 then bead A2
card 3 then bead A3
card 4 then bead A4
card 5 then bead A5
card 6.

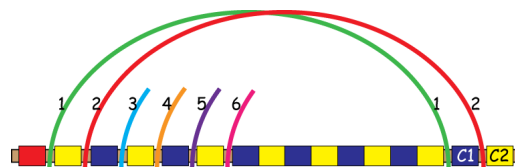

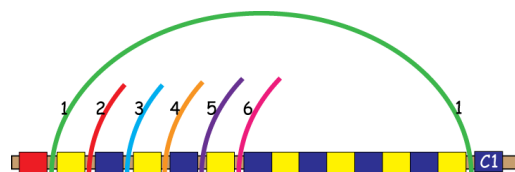

Now place 8 beads onto the stick (B1 to B8).

Now place the other end of card 1 onto the stick after the 8 beads;

Place bead C1 onto the stick.

continue with:

card 2 then bead C2
card 3 then bead C3
card 4 then bead C4
card 5 then bead C5
card 6.

To finish off, put some glue onto the end of the stick and place the stopper bead onto the end.

Leave to dry.
