

# Wish Beads

Threads

6 beads

Scissors

Make a wish before trying this bracelet on.

Wear it until it wears out and falls off and your wish will come true.

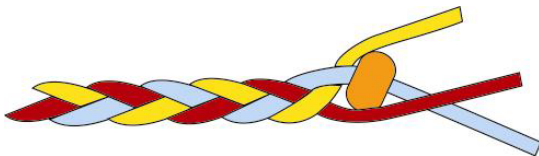

Take three strands of chord, fold one end over to make a loop and tie a knot.

This loop will be used to fasten the Wish Beads around the wrist.

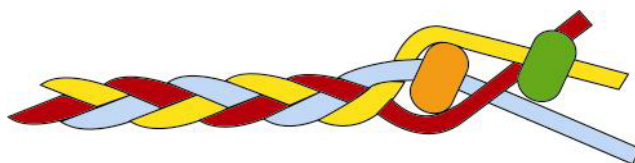

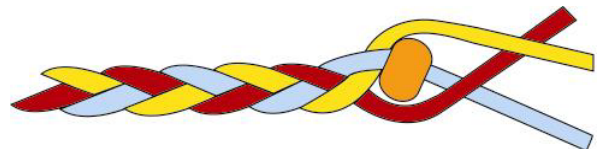

To tie this Wish Bea bracelet, braid like a plait, putting the left strand over the centre one then the right strand over the centre.

Keep going until you are ready to thread the first bead.

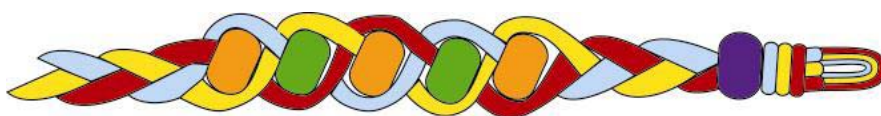

Slip a small bead onto the centre strand and push it up close to the braid.

Cross the left strand over the centre.

Repeat the last two steps until you have added four or five beads.

Continue plaiting until you band is as long as you need it to be.

To finish, knot the threads, then thread a bead onto all three strands and tie another knot.

This last bead is put through the loop and is used to secure the band round the wrist.
